

### AMENDMENTS TO THE CLAIMS

Please amend Claims 1-3, 6, and 7 as follows:

1. (Currently amended) A connection coupling for transferring gaseous and/or liquid fluids, ~~especially for filling gas tanks of motor vehicles~~, comprising a sliding sleeve for locking collet chucks via a connection nipple, wherein a guide sleeve with longitudinal grooves is arranged between the sliding sleeve and the collet chucks in which the collet chucks are guided.

2. (Currently amended) A connection coupling according to claim 1, wherein a spacer sleeve is exchangeably fit into the sliding sleeve.

3. (Currently amended) A connection coupling according to claim 1, wherein the collet chucks are inserted into the longitudinal grooves ~~with a low amount of lateral fitting play~~.

4. (Original) A connection coupling according to claim 1, wherein the guide sleeve comprises a centering incline at its front end.

5. (Original) A connection coupling according to claim 1, wherein a radially circular annular groove for receiving the radially outer ends of outwardly spread collet chucks are arranged radially outside of the guide sleeve.

6. (Currently amended) A connection coupling according to claim 5, wherein the annular groove is formed in a shoulder between the sliding sleeve and a spacer sleeve.

7. (Currently amended) A connection coupling according to claim 1, wherein the guide sleeve is exchangeably fastened with at least one ~~spring-type~~ straight pin to a front housing part.

8. (Original) A connection coupling, according to claim 1, wherein a scraper ring is held radially within the collet chucks around a sealing piston.

9. (Original) A connection coupling according to claim 1, wherein three collet chucks and three longitudinal grooves are provided in a 120° division in the guide sleeve.
